3. Performance of Ultrasonic Devices for Bone Surgery and Associated Intraosseous Temperature Development. S. HARDER, C. MEHL. The International Journal of Oral & Maxillofacial Implants, Volume 24, N°3, 2009.
4. Can piezoelectric surgery change daily dental practice? F. LOUISE, Y. MACIA, Australasian Dental Practice, May / June 2009.
5. Clinical Success in Bone Surgery with Ultrasonic Devices. Marie G. POBLETE-MICHEL, J-F. MICHEL, Foreword Ray C. WILLIAMS, Quintessence International, 2009.

indispensable

EXPERIENCE

SATELEC® know-how recognized by thousands of practitioners.

POWER

Power, precision and safety for fast surgeries limiting soft tissue damage.

SIMPLICITY

Only essential features for ease of use.

RELIABLE

TIP LONGEVITY

- Resistant to all surgical constraints,
- Surgical steel strengthened by surface treatment,
- Excellent durability to sterilization cycles.

IRRIGATION LINE

- Autoclavable up to 100 times*,
- Less supplies for easy maintenance,
- External to the handpiece cord to guarantee the handpiece performance.

PUMP

“ The Piezotome® produced the smallest increase in intra-osseous temperature. ”
Dr. Harder, IJOMI 2009,

- Constant and precise flow controlled until the tip's end,
- Solid and silent.

Memorization

*Disposable lines available on request.

POWERFUL

Working power without any overheating or effort thanks to:

- An advanced and proven electronics,
- A boosted handpiece (6 ceramics),
- An automatic power adjustment.

**CRUISE CONTROL[®]
SYSTEM**

- An efficient and constant cut on all types of bone and any depth of cut,
- Greater regularity and precision,
- A smooth and effortless gesture.

PLUG,
PLAY,
ENJOY.

Technical specifications

Supply voltage:100 VAC - 230 VAC - 50 Hz / 60 Hz
Equipment classification:Class I, BF type
Ultrasonic frequency:Minimum 28 Khz
Dimensions (W x H x D and weight):378 x 136 x 306 mm ; 3.7 kg

Multi-function footswitch (W x H x D and weight): . . .173 x 140 x 176 mm ; 1 kg
Peristaltic pump flow rate:0 to 120 ml/min

This medical device is manufactured according to current regulations and standards (IEC 60601-1) and according to the EN ISO 13485 (2003) quality control certification system.
